ChatGPT said:

Okay Vishnu 👍 let's take one product that's **simple, innovative, and looks great for a BMC video**.

👉 I'll suggest: **Smart Grocery Delivery App** 🛒📱
(A mobile app that delivers groceries quickly, with smart recommendations and budget tracking.)

Now I'll connect it to a **5-minute BMC video script** for you:

🎥 Business Model Canvas Video Script – Smart Grocery Delivery App (5 Minutes)

1. Introduction (30 sec)

"Hello everyone, today I will be presenting the Business Model Canvas for our product.
Our product is a **Smart Grocery Delivery App** designed to help busy individuals and families order groceries quickly, track spending, and get smart recommendations. This app saves time, reduces stress, and makes shopping easier."

---

2. Customer Segments (30 sec)

"Our main customers are **working professionals, college students, and families** who want convenient shopping.
We also target **small retail stores and farmers** who can partner with us to reach customers.
By serving both buyers and sellers, we create a balanced marketplace."

---

3. Value Proposition (30 sec)

"The core value we offer is **time and money savings**.
Unlike traditional grocery shopping, our app provides **instant delivery, personalized suggestions, and budget tracking**.
Customers get what they need faster, and sellers expand their reach."

---

4. Channels (30 sec)

"We connect with customers mainly through our **mobile app**.
We also use **social media marketing, influencer promotions, and referral programs** to increase downloads.
Additionally, we collaborate with local stores to make the app visible in physical spaces too."

---

5. Customer Relationships (30 sec)

"Our relationship with customers is built on **trust and convenience**.
We provide **24/7 customer support, order tracking, loyalty rewards, and personalized discounts**.
This keeps customers engaged and makes them return to our app."

---

6. Revenue Streams (30 sec)

"We generate revenue through multiple streams.
First, a **small delivery fee** for each order.
Second, **subscription plans** for unlimited free deliveries.
Third, **advertisements and promotions** for partner brands.
This mix of revenue streams keeps the business sustainable."

---

7. Key Resources (30 sec)

"Our key resources are the **mobile app, delivery fleet, technology infrastructure, and partnerships with grocery stores**.
We also rely on our development team and customer support team to maintain smooth operations."

---

8. Key Activities (30 sec)

"Our main activities include **app development, managing deliveries, onboarding partner stores, and marketing**.
We also focus on **data analytics** to understand customer preferences and improve recommendations."

---

9. Key Partners (30 sec)

"Our partners are **local grocery stores, supermarkets, farmers, and delivery partners**.
We also collaborate with **payment gateways and cloud service providers**.
These partnerships allow us to operate efficiently and grow quickly."

---

10. Cost Structure (30 sec)

"Our main costs include **app development, delivery operations, marketing, and partnerships**.
We keep costs optimized by using **shared delivery resources and cloud-based infrastructure**.
This ensures our prices remain affordable for customers."

---

11. Closing (30 sec)

"In summary, the Business Model Canvas for our Smart Grocery Delivery App shows how we create value for customers, connect buyers with sellers, and generate sustainable revenue.
With strong partnerships, reliable technology, and customer-focused services, we aim to revolutionize the grocery shopping experience.
Thank you for listening."
